

# C-150 Lamp

**Price:**

**Dimensions:**

Height: 31 cm

Diameter: 20 cm

Weight: 2.9 kg

## PRIMARY USE

C-150 lamp was designed to illuminate factory premises, halls and workshops, mainly served as service and auxiliary lighting.

**Manufacturer:** POLAM – Gdańsk

Time period: 1970s

## CONSTRUCTION

The body is made as an aluminum pressure die-cast – it is interesting that the bodies were cast in the factory of small automobile trucks in Bielsko-Biała. The bulbs are protected by a lampshade made of prismatic glass, which is protected by a steel protective mesh.

Bulb with E 27 base, maximum wattage 150 W.

# C-150 Lamp

## DESCRIPTION OF THE RENOVATION

The offered lamp has undergone a comprehensive renovation, sanding aluminum and steel elements, applying a very strong powder coating (body and steel protective mesh with a frame RAL 7016 structure), all new screws, nuts, washers, installed a new electrical installation based on certified materials.

It is possible to polish the lamp body to a high gloss with the protection of clear varnish in gloss or mat. It is also possible individually choose the colors of the lamp based on the RAL color palette, both powder coating and spray.

Optional spray varnish on request: mat, semi-gloss or gloss. Ordering a non-standard color or colors of the individual components of the lamp is associated with a prolonged waiting time for the product and individual pricing.
