DESCRIPTION

The lamp was based on the original factory winch chain of the 1950s.

CONSTRUCTION

Solid cast iron sprocket mounted on two props with handles equipped with sliding bearings, plus a chain guide profile installed on the main axis.
The whole is fixed to the ceiling with 4 anchors or pins.

Functionality of the lamp: movable rotary mechanism, the level of the lamps can be adjusted by a machine chain. The construction is covered with powder coating, electrical installation based on certified materials.

Lighting – 2 lamps, model C-150 (see lamp C-150 for full specifications).

Warning: very heavy – requires professional and safe installation.
