braided cable, classic plug

DESCRIPTION

The lamp's design is based on the apparatus by Foster Instrument Co. Ltd England, whose origins date back to 1910. The device was made in 1959 and functioned as a transformer. This item was supplied by the British Army, which is confirmed by the sticker on the front panel – Army Base Repair Organisation.

CONSTRUCTION

In the original, wooden box, equipped with a leather handle for transport, there is a light dimmer controlled by a knob, originally used to regulate the voltage. There is a stylish light switch located in the front, a classic bulb holder mounted on a brass tube, and a hand-made lampshade with a wood texture pattern and a Foster Instrument logo on it. Electrical installation based on certified materials.

Bulb with E 27 base, maximum wattage 40 W.
