Cast iron, solid body combined with glass globe protected by a protective mesh made of steel wires. Possibility for hanging.

Factory-set maximum bulb power: 150 W.

OKS-1 Lamp

DESCRIPTION OF THE RENOVATION

The offered lamp has undergone a comprehensive renovation: sandblasting of steel and aluminum elements, application of a very durable powder coating (body – RAL 1036 premium line, protective mesh grating ring – RAL 7016, structure, steel mesh regalvanized). Bulb holder – thread E 27, maximum power of bulb: 150 W. It is possible to sand and polish the lamp body to a high gloss with clear lacquer in gloss or mat, as well as to individually select the color of the lamp based on the RAL color palette both in powder coating and the spray pattern. Optional spray varnish on request: mat, semi-gloss or gloss.

Ordering a non-standard color or colors of the individual components of the lamp is associated with a prolonged waiting time for the product and individual pricing. The vintage version is a form that retains the original patina of age (lacquer, rust, scratches, discoloration and other traces of use), a new electrical installation based on certified materials.
