

OUR-125-1 Lamp

Price:

Dimensions:

Height: 80 cm

Width: 25 cm

Weight: 3.8 kg

PRIMARY USE

The OUR 125-1 lamp was designed to illuminate streets, squares, parks, pavements, open industrial areas, construction sites.

Manufacturer: Zakłady metalowe Mesko, Armii Ludowej 122, Skarżysko Kamienna
Time period: 1980s

CONSTRUCTION

The case is made of aluminum alloy as a pressure cast. Inside, there is a reflector made of electro-polished aluminum. In a separate chamber in the rear part of the body, there used to be a mercury lamp ballast. In the original the case was closed with a lampshade made of prismatic glass ensuring high and constant light efficiency. The lamp was mounted on a tubular boom with a diameter of 50–60 mm. Original bulb – 135 W, mercury type.

Bulb with E 27 base, maximum wattage 200 W.

OUR-125-1 Lamp

DESCRIPTION OF THE RENOVATION

The offered lamp has undergone a comprehensive renovation, sanding aluminum and steel elements, applying a very strong powder coating (body with an electrical box RAL 7016 structure, reflector RAL 9007 premium line). All new screws, nuts, washers, installed a new electrical installation based on certified materials.

It is possible to polish the lamp body to a high gloss with the protection of clear varnish in gloss or mat. It is also possible individually choose the colors of the lamp based on the RAL color palette, both powder coating and spray. Optional spray varnish on request: mat, semi-gloss or gloss.

Ordering a non-standard color or colors of the individual components of the lamp is associated with a prolonged waiting time for the product and individual pricing. It is possible to polish the lamp body and the electrical box to a high gloss with the protection of clear varnish in gloss or mat.
