

# OXY Wall Lamp

**Price:**

**Dimensions:**

Length of the pipe along with the cover: 48 cm  
Height of the mask: 12 cm  
Width of the mask: 11 cm  
Weight: 0.5 kg

## DESCRIPTION

Wall lamp was designed and made on the basis of the original oxygen mask used by RAF fighter pilots.

## CONSTRUCTION

Through a pipe, originally supplying air to the mask, goes a flexible wire, which ends with a threaded casing with a classic E 27 bulb base embedded in it. This type of construction allows the pipe to be freely formed and given an individual shape, causing a change in the ambient light. Inside the mask, there is a steel profile covered with powder varnish for mounting of the lamp. Electrical installation based on certified materials. The maximum power of the bulb: 100 W.

Bulb with E 27 base, maximum wattage 100 W.
