

Pilot Cinema Armchair

Price:

Dimensions: Total height: 86 cm Total width: 57 cm Legs length: 50 cm Weight: 25.3 kg

DESCRIPTION

Original, authentic wooden cinema armchair made in Poland in the 1950s.

CONSTRUCTION

Wooden structure – sides, armrests and legs made of solid wood; profiled backrest and seat plate made of multilayered plywood. The seating part is mounted lavishly with a built-in weight allowing for automatic folding; stable spring structure of the sofa, upholstered classically.

Pilot Cinema Armchair

THE SCOPE OF THE RENOVATION AND IMPLEMENTATION OF THE NEW PROJECT:

The offered armchair has undergone a professional and comprehensive renovation in the field of carpentry and upholstery. All layers of varnish have been removed from the wooden elements and the defects complemented. A new coat of paint has been applied as well. Steel seat structure – damaged springs and handles replaced; a new upholstery lining made of natural, high-quality leather; legs replaced with longer and more stable ones than in the original version.

The “classic” version is a reproduction of the original with the addition of a modern form of the pattern and the color of the upholstery material. The external surface of the wooden structure has been covered with stainless steel in a mirror-like finish with riveting referring to the classic airplane plating. All fixing elements are new.
