

Alarm Button Type W-4519-001

Price:

Dimensions:

Diameter: 11 cm

Overall height: 6.5 cm

DESCRIPTION

Surface-mounted signal switch used to sound the alarm in the event of a fire hazard. Information placed on the front of the switch: "In the event of a fire, break the glass and press the ALARM button". The offered button was an indispensable element of any factory fire alarm installation.

Manufacturer: "Tefla" Bydgoszcz

Production years: 70s

CONSTRUCTION

Two-piece housing is made of a special durable plastic so-called ebonite. The external ring is attached to the body by a thread.

Possibility of setting any power supply (up, down, side).

We offer pre-branded switches packed in original boxes. Date of manufacture placed on the front of the button.

The pictures shown exhibit a sample copy. We choose switches at random when ordering.
