## DESCRIPTION

The original, large classical theater and film spotlight produced in Poland.  
*Year of production: 1970s*

## CONSTRUCTION

The reflector's body is made of steel sheet covered with the original black varnish. The front part has a thick prismatic glass inside, there is a guide with a bulb socket for thread E 27. One external knob allow the bulb to move in the front-back position, which changes the focus of the emitted light.

The reflector is mounted on a rotating steel base. Wide adjustment range of the headlight inclination angle.

The set includes an aluminum and wooden stabile tripod with a two-stage range of height adjustment. Additionally, there is a possibility of setting the legs' spacing in any angle. Distance between individual legs are from 4 cm up to 173 cm.
