

Landing Gear Wheel from the F-16 Fighter Jet

Price:

Dimensions:

Outer diameter: 57 cm

Wheel diameter: 41 cm

Axis diameter: 5 cm

Width: 19.5 cm

Weight: 35 kg

Tire: Michelin Air X

Dimensions: 25.5 x 6.0 x 14

PRIMARY USE

The original wheel included in the three-gear military chassis of the F-16 aircraft.

Manufacturer: Goodyear U.S.A.

Production years: the turn of the 90's and 2000's

CONSTRUCTION

The offered wheel consists of a two-part aluminum rim bolted with 10 screws, and a special air tire. The rim on the inside has a place for a pneumatic disc brake.

The wheel was officially withdrawn from the military use and currently does not meet its original parameters being only a decorative element.
