

A Large Factory Lamp with a Reflector

Price:

Dimensions:

Height: 43 cm

Diameter of the reflector: 52 cm

The height of the reflector: 10 cm

The height of the protective mesh is 25 cm

DESCRIPTION

Hanging cast iron lamp with a reflector was used to illuminate factory and workshop premises where there was dust and the possibility of mechanical damage.

The offered model was a copy of the Polish factory lamp produced in the 1930s by the A. Marciniak lighting factory in Warsaw.

Producer: undefined, country of origin: Poland

Production years: 1950s

CONSTRUCTION

The cast iron massive composite body with a glass cover secured with a protective mesh made of steel wires and a cast iron ring. Additionally, the lamp is equipped with a steel reflector coated with enamel. Possibility of hanging, factory maximum power of 200W bulb.

The offered lamp is a "vintage" version that retains the original patina of time (varnish, rust, scratches, discoloration and other signs of use). The Luminaire has been cleaned, an electrical installation has been replaced based on certified materials. Installed reduction of the bulb thread from E 40 to E 27.
