Diameter of the base: 16 cm

Diameter of the lampshade: 15 cm

Depth of the lampshade: 12 cm

Weight: 3.7 kg

Cable length with switch: 2.3 m

DESCRIPTION

An original workshop lamp from the 1950s, made in Russia. Interesting, very solid, with a functional design.

CONSTRUCTION

The base of the lamp is a heavy cast iron in the shape of a circle, on which a two-part arm made of cast iron is mounted. The arm is covered with a layer of chromium and the manufacturer's signature is preserved on it. The lampshade is held by two movable steel flat bars. The construction has a very wide, two-stage adjustment range.

RANGE OF RENOVATION

The lamp has been thoroughly cleaned, however, the original silver-gray paint, chrome coating and patina of time were retained, and then secured with a special metal wax. The electrical installation has been exchanged. A new brass bulb holder with a ceramic collar adapted to the E-27 thread light source. Electric wire in black cotton braid, a new plug. The materials used have a safety certificate.
