Width: 63 cm

Depth: 94 cm

Weight: 50 kg

## DESCRIPTION

An original American gynecological chair from the 1930s. The chair has a full range of backrest inclination adjustment from 90 to 180 degrees, and adjustment of side supports in the up-down range and an angle towards the handles' axis.

## RANGE OF RENOVATION

The offered armchair has undergone a comprehensive renovation. In the sandblasting process, the old coating of white paint was removed from the massive steel frame, and the primer varnish was applied. It was followed by golden glitter from the Premium line, and the finishing clear coat enhancing the gloss effect. All chromed elements were polished with the preservation of the originally galvanized coating. On the seat and the back, new profiled fillings and upholstery in Chesterfield style made of the highest quality upholstery material. Additionally, in the lower part of the chair, a wooden step with a brass fitting has been reconstructed.
