

Model P 250 "Kwoka" Lamp

Price:

Dimensions:

Total height: 30 cm

Diameter of the lampshade
in the lower part: 19 cm

PRIMARY USE

The offered lamp was designed for heating livestock during their development. The light source was a bulb - a 250 W heat radiator.

Country of origin: Poland

Production years: 1970s

CONSTRUCTION

A Conical aluminum diffuser combined with a pressure-molded housing body, in which a bulb holder for E27 thread is installed. In the lower part of the shade, there is a steel grille protecting the light source. In the upper part, there are special ventilation openings enabling proper cooling of the bulb. The whole is covered with original gray varnish.

RANGE OF RENOVATION

The lamp has been thoroughly cleaned, preserving the original varnish and patina of time, a new electrical installation based on certified materials.
