

# Large Military Floodlight, Type V

Price:

Dimensions:

Total height of the set: 57 cm

Diameter of the reflector: 40 cm

Depth: 46 cm

Weight: 10 kg

## DESCRIPTION

Large signed floodlight from the 70s, which was a part of the US Army equipment.

*Manufacturer: Multi Elec. MFG. Inc. Chicago*

*Year of production: 1972*

## CONSTRUCTION

The floodlight's body consists of two parts: the front part, fulfilling the role of a reflector made of an extruded aluminum sheet, closed in the front with a glass cover, and the rear part - a high pressure aluminum casting, where the electrical system and a bulb holder for the E27 thread are located. Originally, the intended power source was 750-1000 W. Steel adjustable body handle is mounted on a cast iron massive tripod. On one of the grip arms, there is a scale for adjusting the inclination angle of the floodlight.
