DESCRIPTION

The original, large classical theater and film spotlight produced in Poland.

Manufacturer: TECHFILM Warszawa

Year of production: 1970s

CONSTRUCTION

The reflector's body is made of steel sheet covered with the original, so-called "hammer" varnish. The front part has a thick prismatic glass on the inner side, which is secured with a steel mesh. Inside, there is a guide with a bulb socket for thread E 27. Two external knobs allow the bulb to move in the front-back position, which changes the focus of the emitted light.

The reflector is mounted on a rotating steel base with a position locking function. Wide adjustment range of the headlight inclination angle. At the bottom of the base, there is a sleeve for mounting the reflector on a tripod.
