Depth: 27 cm

Fluorescent lamp: length 90 cm,  
power 30 W or greater

Weight: 6 kg

## DESCRIPTION

Original wall-ceiling fluorescent lamp made in Poland in the 1960s. This model has been widely used in various types of industrial plants and medical facilities.

## CONSTRUCTION

The outer part of the lamp housing is made of profiled sheet. Inside, where the fluorescent lamp is installed, there is a semicircular aluminum reflector.

The whole is combined with a tubular steel frame, equipped with lateral adjustment of the lamp inclination angle. On the back of the housing, there is a power switch.

The lamp has been thoroughly cleaned with the original paint coating retained. The electrical installation has undergone a professional service - a new starter and a 30 W fluorescent lamp.

3 point mounting to the wall or ceiling.
