Diameter of the reflector: 16 cm

Depth of the reflector: 18 cm

Weight: 1.2 kg

DESCRIPTION

The original Polish table lamp from the late 1940s, which is a continuation of the design of Polish lighting from the 1930s, structurally modeled on the iconic lamp of the famous Warsaw company "A. Marciniak".

CONSTRUCTION

The base is made of stamped profiled sheet. A switch and a steel chrome arm with the possibility of adjusting the angle of inclination are placed in the base. To achieve full stability, the foundation is filled with a concrete weight. The two-part diffuser is installed on a movable and adjustable handle. The bulb holder is for E-27 thread.

The lamp has been thoroughly cleaned with the original paint coating and patina of time. Electrical installation has undergone a professional technical service.
