

Vintage Tire Inflator

Price:

Dimensions:

Height: 32 cm

Width: 45 cm

Depth: 10 cm

Weight: 10 kg

PRIMARY USE

The tire inflating apparatus was the basic equipment of gas stations, workshops and diagnostic stations and it was used to measure pressure, inflate tires and reduce excess tire pressure.

Manufacturer: "RENOMA" Lublin

Production: 1960s

CONSTRUCTION

The camera body is made of high-pressure die-cast aluminum. In the front part there is a manual switch. In the lower part, there is an air supply from the compressor and a power supply for the pistol that inflates the wheels. Inside, there is a manually controlled air valve mechanism and a large manometer clock made in Russia. The whole is covered with original varnish. There are four mounting holes.
